Summary

Hello everyone!!

My name is Pinaki Shashishekhar Mathan , BTech CSE student of OmDayal Group of Institutions, Uluberia. I am interested and always dreamt of becoming a Computer Engineer and now it seems my dream has come half true. I want to work in data science, Artificial Intelligence, cloud computing, web & app developer, IOT, etc. I am also familiar with different languages like python, C, & Java. And on web development side I am familiar with HTML, CSS, Javascript, Nodejs, PHP and FLASK as python backend framework. I have participated and won in several competitions.

Studying computer science will help me to develop problem-solving, critical thinking and complex analytical skills. Skills such as these are especially useful for specialists working with complex algorithms and big data to create instructions and understand design patterns.
